

Toyota Forklift

Toyota Forklift Training Brampton - In the U.S., Toyota Materials Handling inc., or TMHU, has been the top selling lift truck supplier since 1992. Proudly celebrating more than 40 years of service, the Irvine, California based business provides an extensive line of quality lift vehicles. Stemming from their status of excellence, reliability, and resilience, Toyota remains popular in this aggressive market. Quality is the foundation of Toyota's notorious Toyota Production System practiced at all manufacturing facilities, including TIEM, which is stands for Toyota Industrial Equipment Manufacturing, located in Columbus, Indiana. The majority of the Toyota lift trucks sold in the U.S.A are manufactured here.

All Toyota machines and components manufactured within North America adhere to the International Organization for Standardization or ISO 14001 standard. TIEM has been honored many times for its dedication to constant progress, and its environmental systems. It is the first and only producer to offer EPA and CARB-certified Compressed Natural Gas powered lift trucks on the market. For example, the Toyota 8-Series IC lift vehicles emit 70 percent less smog forming emissions than the existing federal EPA standards and have complied with California's strict emission standards and policies.

Toyota Material Handling, U.S.A. - The Industry Leader

The president of Toyota Material Handling, U.S.A., Brett Wood believes that TMHU's success comes from its dedication to produce high quality lift trucks at the same time as providing exceptional customer support and service. "We must be able to learn and predict the needs of our customers" said Brett Wood. "As a leader, our success also depends on our ability to address our consumers' operational, safety and environmental cost issues." • TMHU's parent company, Toyota Industries Corporation, often known as TICO, is listed in Fortune Magazine as the world's leading lift truck provider and is among the magazines celebrated World's Most Admired Companies.

Redefining Environmental Responsibility

Toyota's parent company, Toyota Industries Corporation, has imparted an exceptional company principles towards environmental conservancy within Toyota. Toyota's rich history of environmental protection whilst retaining economic viability cannot be matched by other organizations and certainly no other resource handling producer can yet rival Toyota. Environmental accountability is a fundamental characteristic of corporate decision making at Toyota and they are proud to be the first and only manufacturer to provide UL-listed, EPA- and CARB-certified Compressed Natural Gas powered lift trucks. Yet an added reason they remain a leader within the industry.

In 2006, Toyota released the 8-Series line. The 8-Series signifies both Toyota's innovation and leadership in the industry. It features an exclusive emission system that surpasses Federal EPA emission principles, and also meets California's more elaborate 2010 emission standards. The finished creation is a lift vehicle that produces 70 percent fewer smog forming emissions than the present Federal standards allow.

Also starting in 2006, collectively with the Arbor Day Foundation, Toyota added to its commitment to the natural environment. To this day more than 58,000 trees have been embedded in the ground throughout state forests and community parks that were damaged by fires and other natural causes. 10,500 seedlings have also been spread through Toyota Industrial Equipment's network of dealers to non-profit organizations and local consumers to help sustain communities all over the United States

Industry-Leading Safety

Toyota's lift vehicles offer enhanced durability, visibility, efficiency, ergonomics, and all the leading safety equipment that has made Toyota an industry leader. The company's System of Active Stability, also referred to as "SAS", helps limit the chance of incidents and injuries, in addition to increasing productivity levels while minimizing the likelihood of product and equipment breakage.

System Active Stability senses numerous aspects that could lead to lateral volatility and potential lateral overturn. When one of those factors are detected, SAS instantly engages the Swing Lock Cylinder to stabilize the rear axle. This adjusts the lift truck's stability trajectory from triangular in shape to rectangular, providing a major increase in stability which substantially reduces the probability of an accident from a lateral overturn. The Active Mast Function Controller or the Active Control Rear Stabilizer also helps to avoid injuries or accidents while adding durability.

SAS was first introduced to the market on the 7-Series internal combustion products in 1999 and subsequently catapulted Toyota into the industry leader for safety. Ever since then, SAS have been integrated into most of Toyota's internal combustion models. It is standard equipment on the latest 8-Series. There are more than 100,000 SAS-equipped lift vehicles in action, exceeding 450 million hours combined. The increased population of SAS-equipped trucks in the field, along with compulsory worker education, overturn fatalities across all models have decreased by 13.6% since 1999. Additionally, there has been an overall 35.5% decrease in industry wide collisions, loss of control, falls and tip overs from a lift truck for the same period.

Toyota's hardnosed standards continue far beyond the machinery itself. The company believes in providing general Operator Safety Training services to help clients satisfy and exceed OSHA standard 1910.178. Instruction courses, videos and an assortment of materials, covering a wide scope of subjects-from individual safety, to OSHA policies, to surface and load conditions, are offered through the supplier network.

Toyota's Commitment to The U.S.A.

Ever since the sale of its first lift truck in the U.S. to the manufacture of its 350,000th lift vehicle produced in 2009 at Toyota

Industrial Equipment Manufacturing, TMHU has maintained a solid presence in the U.S. This reality is demonstrated by the statistic that 99% of Toyota lift trucks sold in America at the moment are manufactured in the United States.

TMHU is situated in Columbus Indiana and houses nearly 1 million square feet of manufacturing facilities over 126 acres of land. Facilities include a National Customer Center, as well as manufacturing operations and distribution centers for equipment and service parts, with the whole investment exceeding \$113 million dollars.

The new National Customer Center was conceived to serve both dealers and clients of TMHU. The facility includes a 360-degree display room, a presentation theater complete with stadium seating for 32, an area for live merchandise demonstrations with seating capability for 120; a presentation theater; Toyota's Hall of Fame showcasing Toyota's history since the birth of its creator, Sakichi Toyoda, in 1867, and lastly a instruction center.

First in Client Satisfaction and Service

TMHU has 68 official industrial equipment dealers, along with 189 dealership locations all through the United States, offering the most comprehensive and inclusive consumer support and customer service in the industry. The company's new and Certified Used lift trucks, service, components, and financing capabilities make Toyota dealerships a one-stop shop to ensure overall client satisfaction.
