

## **Aerial Lift Train the Trainer Brampton**

Aerial Lift Train the Trainer Brampton - The train the trainer program designed for aerial lifts helps to teach the trainers how to safely train prospective operators in an industrial situation. Trainers would be given in-depth instruction on the workings of aerial lift machinery. The program is offered on an open enrollment basis and delivered at select training locations. Prior to certification, trainers are evaluated and scored on their demonstrated skills and understanding.

The Aerial Lifts Train the Trainer Certification Program emphasizes practical learning. As the number one training provider within the industry, we give the best hands-on training possible through opportunities to practice concepts and techniques learned in the classroom. In addition to hands-on experience, trainers develop general understanding of equipment theory and instructional techniques, field and classroom communication skills, and ability to efficiently train and assess operators. Trainers will gain knowledge about what traits make a successful trainer.

The Aerial Lifts Train the Trainer Program also teaches the right techniques necessary in order to express the right information within the classroom and field setting. There are three factors of machinery operation which the trainer must learn how to convey to operators: what to do; how to do it; and the reason why it needs to be done.

The program provides up-to-date, detailed reference material to help trainers convey the subject matter to machine operators. Instruction manuals include detailed information regarding all aspects of industrial mobile equipment operator training. Included in the package are training aids which provide a visual reference to improve the learning experience. The equipment-specific training products include important materials for both the operator and the trainer: overhead transparencies, videos/DVD's, kinds of equipment, safety message posters; stability pyramids and digital training aids.
