

Order Picker License Brampton

Order Picker License Brampton - Order picking is otherwise referred to as order preparation operation. This is among the key processes in a warehouse and consists of people called order pickers, taking and collecting articles in a specific quantity previous to shipment so as to accomplish customer orders. Order picking is a simple warehousing method. The efficiency in which this particular job is done can be directly linked to a supply chain's productivity. Thus, order picking is amongst the most controlled logistic methods. Order picking falls in the category of the warehouse management system.

There are some certain kinds of order picking. The main kinds include: wave picking method, pick to box method, piece picking or picker to part method, sorting systems method and zone picking method.

The pick to box method consists of the order picker filling the box with the stuff from his or her station. The box then moves to other picking locations until the customer order is complete. In this technique, there is no movement of the order picker personnel. In the wave picking method, the order pickers move all-around in order to gather the needed products for some orders. The piece picking or picker to part method is similar where the order picker or pickers move so as to gather the stuff required but for one order only.

There is no movement by the order picker in the sorting systems method. Rather, things are brought to the orderpicker by an automatic system like an automatic storage system or a conveyor system. In the zone picking method, every order picker is assigned to one particular area. They are responsible for only realizing order picking in this particular zone.
