

Manlift Ticket Brampton

Manlift Ticket Brampton - The Elevated Platforms and Manlifts Certification program helps to provide the necessary training on the safe operating procedures, work practice, rules and regulations regarding the everyday activities for the operators of this machinery. The course has been designed for individuals who are actively involved in these activities or individuals who have a basic knowledge of this equipment.

During the last couple of decades, manlifts and aerial platforms have become a common sight on construction job sites and in industrial maintenance applications. These equipment provide an easy way to lift workers close to what must be carried out on a stable platform apparatus, allowing staff to do tasks with greater comfort and safety rather than being perched on top of ladders or scaffoldings.

Similar to every other device, manlifts are just safe if they are used properly. As they lift staff above ground level or floor, accidents could happen easily and this could result in serious injuries or fatalities for both the operators of the manlift and any passerby who may be unlucky enough to be standing beneath.

There are different models of manlifts. Most fall into 1 of 2 categories: the articulating boom lift, which has the capability of both vertical and horizontal movement and the scissors lift, which is capable of moving upward and downward.
